PROFESSIONAL SUMMARY

With over 3 years of experience, I specialize in dynamic web application development, emphasizing user experience and accessibility. I've contributed to projects involving dynamic form creation, user data interaction systems, and critical issue resolution within design systems. My expertise includes React, TypeScript, Redux, Styled Components, and comprehensive testing practices to ensure reliability and adherence to accessibility standards like WCAG 2.1.

SKILLS

Technical Skills: JavaScript (ES6+), TypeScript, React.js, Redux, Next.js, HTML5, CSS3, SCSS/SASS, Node.js, Express.js, Jest, React Testing Library

Development Tools: Git, GitHub, GitLab, storybook

Other Skills: WCAG 2.1 Guidelines, ARIA, Semantic HTML, SiteImprove, Voiceover

WORK EXPERIENCE

Frontend Developer

Freston Analytics | Apr 2023 - Present | Ipswich, England, UK

- Contributed to a project where **admins can create forms dynamically**. Implemented a system where **users can fill data into these forms**. Designed a **form tracker** using CSS to visualize the form's progress.
- Actively participated in **design discussions** and wireframing sessions. Ensured alignment between design decisions and feature development.
- Contributed features and **bug fixes** to a common project template. Maintained consistency across projects by enhancing the template.
- Developed **React applications** using **TypeScript, Redux, and Styled Components**.
- Fixed critical issues and enhanced **reusable components** within an internal design system.
- Wrote comprehensive **test cases** to ensure component reliability.

Assistant System Engineer

TCS | Mar 2021 - Mar 2023 | Delhi, India

- Developed and maintained web applications using JavaScript, HTML5, and CSS3, adopting Sass for more efficient, modular CSS coding.
- Designed and implemented accessible, mobile-first web applications using semantic HTML, CSS/SCSS, and JavaScript (ES6+). Ensured **seamless user experiences across various devices**, adhering to WCAG 2.1 guidelines and leveraging tools like Voiceover and SiteImprove for comprehensive accessibility testing.

Software Engineer

NDTV Convergence | Jun 2019 - Dec 2019 | Delhi, India

- Worked closely with Product Owners and SMEs to understand feature requirements and collaborated with UX/UI team to ensure optimal user experience.
- Wrote well-structured React code, supporting continuous Front-End changes across the website and ensuring responsiveness across viewports.
- Worked in an Agile environment, ensuring quality deliverables.

EDUCATION

GGSIPO, Delhi, India | July 2015 - July 2019

Bachelor of Technology - Computer Science and Engineering
